

Fortress Fire & Security understand that security is a very personal matter; a "one size fits all" solution isn't always best. ♦ Every home has specific requirements and will listen to your needs and wants to customise a solution just for you.

All systems installed will fully comply with DD243, PD6662, EN5013-1, BSEN ISO 9001:2000 and the NSI Codes of Practice.

FREE Security and Risk Assessment

Our free security and risk assessment of your home allows our security consultant to discuss with you the options available and then design a security solution based on your individual requirements.

We recommend a security survey and risk assessment where there is a need for;

- ♦ expert opinion from a security professional
- ♦ pet friendly systems
- ♦ a conservatory or garage needs to be protected
- ♦ CCTV and door entry systems

To ensure client safety and absolute integrity, all our security experts and advisors are vetted to the highest standards as defined by National Security Inspectorate (NSI).
